

CORE LOGGING GEOLOGIST

Field	Geology
Type	Seasonal / Contract
Location	Merritt, British Columbia, Canada
Reports To	Project Geologist

ABOUT WESTHAVEN GOLD (TSX-V: WHN | OTCQB: WTHVF)

Westhaven Gold Corp. is a Canadian gold and silver exploration and development company advancing high-grade epithermal mineralization in the Spences Bridge Gold Belt of southern British Columbia — one of Canada's most prospective and underexplored gold districts. Westhaven controls more than 60,000 hectares across four properties along the belt.

Our flagship Shovelnose Gold Project is emerging as a low-cost, high-margin underground gold opportunity. In February of this year, Westhaven entered a strategic earn-in agreement with Dundee Corporation, committing up to C\$85 million to advance the Shovelnose Gold Project, which includes a 50,000 metre drill program in 2026, the largest in the company's history.

We're building the team to match that ambition and looking for motivated, hard working and team-oriented people who want to grow their careers and help shape the next phase of growth at Westhaven.

ABOUT THE ROLE

We are seeking a detail-oriented and motivated Core Logging Geologist to support active drilling programs at our project site in British Columbia. This is a field-based role requiring extended rotations in Merritt, BC. The successful candidate will be responsible for the systematic logging, sampling, and documentation of drill core, and will play a key role in advancing our geological understanding of the deposit.

KEY RESPONSIBILITIES

Core Logging & Sampling

- Log drill core in detail, including lithology, alteration, mineralization, veining, and structure
- Mark sample intervals and coordinate core cutting and bagging in accordance with QA/QC protocols

- Photograph core trays and maintain organized, accurate core storage
- Identify and document indicator minerals consistent with the target deposit style (low-sulphidation epithermal gold and silver)
- Visual inspection of drill rigs; conduct downhole surveying; communicate between drillers and geological team
- Other duties as assigned

Data Management & Reporting

- Enter geological data into database management systems accurately and in a timely manner
- Assist in the preparation of daily, weekly, and end-of-program geological reports
- Contribute to geological interpretations and cross-sections as required

Site & Safety

- Follow all site health, safety, and environmental policies and procedures
- Participate in daily safety meetings and hazard identification
- Maintain a clean and organized core shack environment
- Liaise with drillers and field technicians in a professional and collaborative manner

QUALIFICATIONS & EXPERIENCE

Required

- Working toward or holding a certification in geology or a related earth science discipline (B.Sc., diploma, or equivalent)
- Familiarity with low-sulphidation epithermal, porphyry, or orogenic gold systems considered a strong asset
- Proficiency with computers and geological data entry software (e.g., Microsoft Office, acQuire, QGIS, Geobank, or similar)
- Strong attention to detail and ability to maintain consistent logging standards over extended periods
- Physically fit and comfortable working in field conditions

Preferred

- Minimum 1–2 field seasons of core logging experience
- Experience with oriented core, structural geology, and drilling in general
- Familiarity with the Spences Bridge Gold Belt or similar BC geological terranes
- First Aid certification (OFA Level 1 or higher)
- Valid driver's license

WORKING CONDITIONS

This position is based in Merritt, British Columbia (approx. a 3-hour drive from Vancouver; 45-minute drive to Kamloops; and 1 hour drive to Kelowna).

Westhaven operates under a variance in accordance with Employment Standards of British Columbia with a **rotation of 20 days on, 10 days off**. The role may involve occasional remote field work in varying weather conditions.

Accommodations at site will be provided as well as a daily per diem for meals and travel expenses.

COMPENSATION

The expected salary range for this position is approx. **CAD \$90,000 – \$120,000** in line with the competitive job market for such roles carried out in British Columbia. Salary ranges are guidelines and any job offer received by a candidate will be determined on several factors such as relevant education, training, and/or experience.

HOW TO APPLY

Qualified candidates are invited to submit a resume with the email subject line “**Core Logging Geologist**” to careers@westhavengold.com.

All Applicants **MUST** be legally entitled to work in Canada. Priority hiring consideration will be given to Indigenous Nations members who reside within the territories our projects are located.

We thank all applicants for their interest effort in applying for the position; however, only those selected for an interview will be contacted.

Westhaven Gold is an equal opportunity employer and is committed to fostering an inclusive, diverse, and respectful workplace. Employment decisions are made without regard to race, colour, religion, sex, gender identity or expression, sexual orientation, age, national or ethnic origin, disability, family status, marital status, or any other characteristic protected by applicable Canadian federal, provincial, or territorial law. We encourage applications from all qualified individuals and are committed to providing accommodation throughout the recruitment and employment process in accordance with applicable legislation.
